Student Mobile App

The Fame Student Mobile App allows students to stay up to date with the progress of their education. Students can also see their attendance, academic, and financial information on their phones or tablets, saving time for both staff and students.

With the integration to Fame's Student Information System, data is updated constantly, and there is no need for manual updates in the mobile app.

Financial

Within the app, students gain visibility into important financial information such as charges, payments, and refunds, as well as their financial aid amounts and overall ledger balance. With the ability to link to your payment portal, students also have the convenience to make payments straight from their phones.

Academics

Students can view their overall GPA, course averages, and download their progress report. Students can also be informed of their Satisfactory Academic Progress and will be notified if they fall into a warning or ineligible status for Title IV.

Attendance

A simple way to capture student attendance easily and securely via the student's smartphone. A rotating PIN and biometric authentication ensures student validation and prevents the sharing of clock-in information. Students can view their punches, hours summary, and attendance history report.

And More...

Keep your students up to date with push notifications. Quickly send a message to all Students informing them of an emergency, school closure, or important event. Schools also ave an option to turn on student messaging, allowing students to send questions to departments or administrators.
